David Stolz and Brandon Whitfield

ISA Project 7 Report

1. All Code can be seen in our repo: https://github.com/bjw4ph/ISAProject
2. User Stories
   a. As a user, I should be offered task suggestions based on previous users viewed tasks.
      i. These suggestions should be updated from a log file every two minutes
3. Unit Tests:
   a. No additional views were created for this project in the model layer and therefore no additional unit tests were written. The recommendations were added to the 'task_main' view. All original tests for the models layer are still being run by our Travis CI script
4. Input File: /batch/logfile.txt found in the batch folder in the top level of the Github Repo
5. Output File: sparkOutput.txt is on the top level of the Github Repo
6. Automation Script: spark_start.sh in the top level of the Github Repo
7. Spark Job: /batch/hello.py found in the batch folder from the top level of the Github Repo
8. Nothing else really to mention, thanks for a great semester
